Supplementary Fig. 2. Sequential changes in the warts on the interdigital space of the toes after sodium tetradecyl sulfate intralesional injections. A 39-year-old male with acute lymphoblastic leukemia had been treated with cryotherapy for warts for 2 years. (A) The initial image of the warts. (B) Two weeks after the 1st sodium tetradecyl sulfate intralesional injection. (C) Two weeks after the 2nd sodium tetradecyl sulfate intralesional injection.
